Chicago. Dec. 22.—The last session of the board previous to the Christmas adjournment peased without violently changing the previous prices of any important speculative commodity. Wheat gained and everything else lost a similar triffe as compared with yesterday's closing values. Further than the small fraction improvement due to some favorable figures regarding the week's movement of the wheat crops of the world, today's short session in so far as he wheat narket is concerned, might have been thrown in with the other Christmas holidays. Corn was oppressed by heavy receipts for which there was no market except at still more liberal concessions in the price than were previously necessary. The days receipts were 40 cars and for Monday 500 cars are estimated. The east is seiting supplies from Ohio, Tennessee and elsewhere to a sufficiently liberal extent to make them independent of Chicago in the meantime.

AN ARTISTS INSPIRATION.

Inable to Braw a Picture Except in the Presence of a Certain Figure.
Walter Burridge, the artist, tells a good story on himself pad proves it by showing the blank space on the wall where the picture, one of the accessories of the tale, used to hang.

He went one day to the studio of a friend and found there an anotomical figure, such as are to be seen in sudios everywhere. It was a good one, and Burridge wanged it, for his own had been broken. He expressed a desiting supplies from Ohio, Tennessee and elsewhere to a sufficiently liberal extent to make them independent of Chicago in the meantime.

than were previously necessary. The days receipts were solt cars and for Mondays 50c cars are estimated. The east is cetting supplies from Ohlo, Tennessee and chewhere to a sufficiently liberal extent to make them independent of Chicago in the meantime.

The sales made earlier by Illinois shippers of crin to arrive on a basis of 40 cents to farmers is now coming into the possession of the purchasers and the latter have no use for it. The sample corn is offered at a further decline of 1 cent to 1½ cents per bushel. May corn comend at from 48:48%, sold as high as 48'48, and as low as 47'5, closing with buyers at 48.

Oats were quiet, the natural tendency lasting over from the tone of the market during the last few days was to decline and partly in sympathy with corn, lower prices were scored. May sold from 31.46 all about an hour after the owner came back. He sat down and tried to draw a wagon. But he couldn't. The provisions prices did not change much, but such alteration as there was went to the credit of those who were short. The decline was 2½ in each of three speculative articles.
